

Save the station list to a CSV file

Remove the selected stations from the table

Set "From Year" value for all the stations at once

Set "To Year" value for all the stations at once

The screenshot shows the GWHAT 0.1 software interface. The top menu bar includes 'Download Weather', 'Gap Fill Weather', 'Plot Hydrograph', and 'Analyze Hydrograph'. The 'Download Weather' menu is open, showing icons for search, save, delete, and download. The main table lists weather stations with columns for selection, station name, from year, to year, province, and climate ID. The right sidebar shows 'Formatted Weather Data Info' with 'Select' and 'Save' buttons and a checkbox for 'Automatically save formatted weather data'.

Download data for the selected stations

	Weather Stations	From Year	To Year	Prov.	Climate ID
<input checked="" type="checkbox"/>	STE MADELEINE	1980	2016	QC	7027517
<input checked="" type="checkbox"/>	IBERVILLE	1980	2016	QC	7023270
