

Open the climate stations browser

Add stations to the table from a csv file

Save the station list to a csv file

Remove the selected stations from the table

Download data for the selected stations

The screenshot shows the GWHAT 0.1.1 software interface. The main window has a menu bar with 'Download Weather', 'Gap-Fill Weather', 'Plot Hydrograph', and 'Analyze Hydrograph'. Below the menu bar is a toolbar with icons for search, file operations, and data management. The 'Weather Stations' table is the central component, listing stations with checkboxes for selection, and columns for 'From Year', 'To Year', 'Prov.', and 'Climate ID'. The 'Formatted Weather Data Info' panel on the right includes 'Select' and 'Save' buttons, a large text area, navigation arrows, and a checkbox for 'Automatically save formatted weather data'.

Weather Stations

	From Year	To Year	Prov.	Climate ID
<input checked="" type="checkbox"/> STE MADELEINE	1980	2016	QC	7027517
